ACRYLIC EMULSION COATING NZ-134

Product Description

NZ-134 is a single pack high-performance water-based acrylic coating.

Recommended Use

This coating can be used as a protective and decorative coating on concrete surfaces and other masonry substrates, especially in aggressive, polluted and coastal environments.

Outstanding Characteristics

- Excellent adhesion
- Excellent water resistance
- Good weather resistance
- Good UV resistance
- Good flexibility & decorative appearance

Surface Preparation

The surface must be clean, dry and free from any contamination such as grease, salt and loose paint.

Use of suitable sealer such as NZ-570 and putty NZ-599 is suggested for better results.

Technical Data

Finish	Flat
Color	Upon request
Solid by volume	45±3%
Specific Gravity	1.45±0.10 gr/cm ³
Recommended D.F.T.	80-100 microns
Theoretical coverage	6.0-4.2 m ² /L Practical coverage depends on loss factor
Touch dry	30 min. at 20°C
Hard dry	5 hrs. at 20°C
Shelf life	12 months at 25°C
Package	20 liter container

Application Details

Application method	Air spray, Brush ,Roller
Surface temperature	10-45 °C
Mixing ratio	Single Pack
Thinner/cleaner	Water
Pot Life	N/A
Recoat interval	Min 5 hrs. at 20°C Max indefinite Recoating intervals related to later conditions of exposure

Note: Film thickness may be specified in another film thickness than indicated depending on purpose and area of use. This will alter the spreading rate and may influence the amount of thinning necessary, drying time and recoating interval.

Safety: Handle with care. Before and during use, observe all safety labels on packaging and paint containers. Avoid inhalation, avoid contact with skin and eyes, and do not swallow. Take precautions against possible risks of fire or explosions as well as protection of the environment.
